### RONALD MORGAN HARRIS-WARRICK

Professor

Section of Neurobiology and Behavior

Cornell University

1. Harris-Warrick, R.M., U. Elkana, S.D. Ehrlich and J. Lederberg. Electrophoretic separation of *Bacillus subtilis* genes. *PNAS (USA)* 72: 2207-2211 (1975).
2. Harris-Warrick, R.M. and J. Lederberg. Interspecies transformation in *Bacillus*. I. Sequence heterology as the major barrier. *J. Bact.* 133: 1237-1245 (1978).
3. Harris-Warrick, R.M. and J. Lederberg. Interspecies transformation in *Bacillus*. II. The mechanism of heterologous intergenote transformation. *J. Bact.* 133: 1246-1254 (1978).
4. Sutter, A., R.J. Riopelle, R.M. Harris-Warrick and E.M. Shooter. Nerve Growth Factor. Characterization of two distinct classes of binding sites on chick embryo sensory ganglion cells. *J. Biol. Chem.* 254: 5972-5982 (1979).
5. Sutter, A., R.J. Riopelle, R.M. Harris-Warrick and E.M. Shooter. The heterogeneity of Nerve Growth Factor receptors. In *Transmembrane Signalling (The proceedings of the ICN-UCLA symposium)*, Alan R. Liss Inc., New York, pp. 659-667 (1979).
6. Harris-Warrick, R.M., M. Bothwell and E.M. Shooter. Subunit interactions of 7S Nerve Growth Factor regulating the binding of NGF to receptors on embryonic chick sensory neurons. *J. Biol. Chem.*, 255: 11284-11289 (1980).
7. Livingstone, M., R.M. Harris-Warrick and E.A. Kravitz. Octopamine and serotonin produce opposite postures in lobsters. *Science* 208: 76-79 (1980).
8. Schwarz, T.L., R.M. Harris-Warrick, S.G. Glusman and E.A. Kravitz. A peptide action in a lobster neuromuscular preparation. *J. Neurobiol.* 11: 623-628 (1980).
9. Kravitz, E.A., S. Glusman, R.M. Harris-Warrick, M. Livingstone, T. Schwarz and M.F. Goy. Amines and a peptide as neurohormones in lobsters: Actions on neuromuscular preparations and preliminary behavioral studies. In *J. Exp. Biol. Symp.: Neurotransmission, Neurotransmitters and Neuromodulators.* 89: 159-176 (1980).
10. Riopelle, R.J., A. Sutter, R.M. Harris-Warrick, M. Klearman and E.M. Shooter. Receptor interactions of Nerve Growth Factor. *Adv. Neurol.*, 299: 133-148 (1981).

11. Kravitz, E.A., S. Glusman, M. Livingstone and R.M. Harris-Warrick. Serotonin in the lobster nervous system. Mechanism of action at neuromuscular junctions and preliminary behavioral studies. In B.L. Jacobs and A. Gelperin, eds., Serotonin: Neurotransmission and Behavior, MIT Press, Cambridge, Mass., pp. 189-210 (1981).
12. Bergman, H., S. Glusman, R.M. Harris-Warrick, E.A. Kravitz, I. Nussinovitch and R. Rahamimoff. Noradrenaline augments tetanic potentiation of transmitter release by a calcium-dependent process. *Brain Res.* 214: 200-204 (1981).
13. Kravitz, E.A., B.S. Beltz, S. Glusman, M.F. Goy, R.M. Harris-Warrick, M.F. Johnston, M.S. Livingstone, T.L. Schwarz and K.K. Siwicki. Neurohormones and lobsters: biochemistry to behavior. *Trends in Neurosci.* 6: 346-349 (1983). This paper has been reprinted in an anthology, *Neurotransmitters in Action*, ed. D. Bousfield, Elsevier, (1985).
14. Kravitz, E.A., B. Beltz, S. Glusman, M. Goy, R.M. Harris-Warrick, M. Johnston, M. Livingstone and T. Schwarz. The well-modulated lobster: the roles of serotonin, octopamine and proctolin in the lobster nervous system. *Pesticide Biochemistry and Physiology* 22: 133-147 (1984).
15. Cohen, A.H. and R.M. Harris-Warrick. Strychnine eliminates alternating motor output during fictive locomotion in the lamprey. *Brain Research* 293: 164-167 (1984).
16. Beltz, B., J.S. Eisen, R. Flamm, R.M. Harris-Warrick, S. Hooper and E. Marder. Serotonergic innervation and modulation of the stomatogastric ganglion of three decapod crustaceans. *J. Exp. Biol.* 109: 35-54 (1984).
17. Harris-Warrick, R.M. and E.A. Kravitz. Cellular mechanisms for modulation of posture by serotonin and octopamine in the lobster. *J. Neurosci.* 4: 1976-1993 (1984).
18. Harris-Warrick, R.M., J.M. McPhee and J. Filler. Immunocytochemical visualization of serotonin in the lamprey spinal cord. *Neuroscience* 14: 1127-1140 (1985).
19. Harris-Warrick, R.M. Amine modulation of extension command element-evoked motor activity in the lobster abdomen. *J. Comp. Physiol.* 156: 875-884 (1985).
20. Kravitz, E.A., B. Beltz, S. Glusman, M. Goy, R. Harris-Warrick, M. Johnston, M. Livingstone, T. Schwarz and K. Siwicki. The well-modulated lobster: The roles of serotonin, octopamine, and proctolin in the lobster nervous system. In: A.I. Selverston, ed., *Model Neural Networks and Behavior*, Plenum Publishing Corp., pp. 339-360 (1985).
